

## PRESS RELEASE for immediate release

31 August 2011

### Summa releases Basket for F1612

In the first half of September Summa will release a handy tool for its F1612 cutting table: the Basket. This Basket is specially developed to capture the cut-out samples and the waste material from the F1612 in order to keep the workspace clean.

The F1612's Basket is a separate unit mounted on sturdy rollers, so it can be easily moved around. It includes also magnets to keep the trolley in position when placed in front of the cutting table.

The Basket can be placed in different positions. The front part can be tilted to make the cutting table easily accessible for the operator. Besides, the Basket's front bar can be moved to a lower position. This way the content of the basket moves up and can be easily reached. To carry and idle it completely, the Basket can also be taken out.

The Basket will be presented for the first time at the Viscom France show in Paris (Paris Nord Villepinte) from 27 until 29 September. Curious visitors are most welcome at Summa's stand H14!

#### About Summa

With 25 years of experience building cutting plotters, Summa delivers highly reliable and accurate products for the sign making, labelling, vehicle wrap, aerospace and outdoor advertising industries. One of the key features of all Summa products is their unmatched durability. Summa's product range includes the remarkably productive S Class and SummaCut cutting plotters, the DC4 thermal transfer printer-plotter and the new Summa F Series cutting table. All Summa cutters come bundled with a wide range of accessories, consumables and software options for both Mac and PC systems.

Summa's European headquarter in Gistel, Belgium, can be reached by calling +32 59 270011 or via the Web at [www.summa.eu](http://www.summa.eu).
